Content (*feel free to specify location of images referenced below*):

Reliance Foundry's recycled rubber parking curbs guide cars effectively while pulling into parking spots, preventing damage to both the car's bumper and any nearby walls.

In addition, the low profile of these parking curbs safeguard potential damage to today's low, front end car designs, while providing additional parking guidance.

http://www.gnrtech.com/img_gnr/parking_curb/ParkItParkingCurb_ParkingLot1.gif

When a customer parks on your property, they may not be familiar with the clearance between the front end of their car and a regular concrete curb. A rubber parking curb from Reliance Foundry can save them from a costly repair job. Your customers will thank you!

The existing concrete curbs and walls of your infrastructure can also be protected from damage due to accidental parking bumps by installing parking curbs.

Reliance Foundry's parking curbs have been used in the following locations:

- WalMart
- Target
- St. Frances Hospital
- McDonald's
- Burger King
- Eckerd
- Dunkin Donuts
- Bank One
- Hilton Hotels
- Montreal Children's Hospital
- El Conquistador resort

Enhance the esthetic value of your property with these parking curbs that come in more than just black. There is blue, especially useful for handicap parking spaces, and the innovative terracotta color.

Made from 100% recycled rubber, parking curbs from Reliance Foundry are maintenance free, long lasting, and cost efficient.

Reliance Foundry's parking curbs:
- Ideal for indoor or outdoor parking
- Will not chip, crack, or fade
- Have high visibility at night
- Simple installation by one person
- Can be installed on any road surface
- Resistant to ultraviolet light, moisture, oil, and extreme temperatures
- Temporary or permanent installation
- 1/10th the weight of a standard concrete curb
- Do not require heavy machinery
- Maintenance free
- Warranty: 3 years on the product; 1 year on the tape (under normal use).

Locate them where a vehicle might park too close to a wall, or any place you want to assist drivers in parking, to offer superior protection.

Each parking curb has reflective tape applied to it for maximum visibility, even at night.

Parking curbs come with pre-molded holes and can be shipped with anchoring spikes or lag bolts for installation. They are lightweight (34 lbs. for a 6' car stop) and flexible; conforming to the contour of uneven road surfaces.

There are several parking curbs to choose from:

- **R-2006-Y:** 6' Yellow - 6 Feet Long x 6" Wide x 4" High, Weight = 34 lbs. Produced from 100% black recycled rubber, with yellow parallelogram shaped reflective tape.
- **R-2006-W:** 6' White - 6 Feet Long x 6" Wide x 4" High, Weight = 34 lbs. Produced from 100% black recycled rubber, with white parallelogram shaped reflective tape.
- **R-2006-BW:** 6' White (On Blue) - 6 Feet Long x 6" Wide x 4" High, Weight = 34 lbs. Produced from 100% blue recycled rubber, with white parallelogram shaped reflective tape.
- **R-2004-Y:** 4' Yellow - 4 Feet Long x 6" Wide x 4" High, Weight = 22.5 lbs. Produced from 100% black recycled rubber, with yellow parallelogram shaped reflective tape.
- **R-2003-Y:** 3' Yellow - 3 Feet Long x 6" Wide x 4" High, Weight = 17 lbs. Produced from 100% black recycled rubber, with yellow parallelogram shaped reflective tape.

Recommend Installation Areas Include:
- Surface parking lots
- Multi-level parking lots
- Parking garages
- Warehouses (both interior and exterior)
- Loading docks
- Anywhere vehicles and buildings could benefit from this kind of protection

Parking Curbs LANDING PAGE

Installation is easily done by one person, with a minimum of tools. The install can be permanent or temporary.

Installation Guide

Components:

- Parking curb
- 1/2" (diameter), 14" (length) rebar spikes for asphalt or lag bolts with washers and metal shields for concrete

What You Need:
- Gloves, safety glasses
- Traffic cones, drums or barricades for securing the site
- Mallet
- Heavy duty electric drill
- 1/2" masonry bit, and if installed with the lag bolts: a masonry bit required for the metal shields - consult bit size on side of shield
- A drive socket and a power tool for installation of the lag bolts

Installations Instructions for Asphalt: Installation of parking curbs with spikes
(ideal for permanent installation)

Step 1.
Drill 1/2" diameter holes (3 - 4" in depth) in the asphalt through the product's holes.

Step 2.
Drive 1/2" rebar spike (14" long) through the holes in the product.
http://www.gnrtech.com/img_gnr/parking_curb/ParkIt_Installation1.gif

Installation Instructions for Concrete: Installation of parking curbs with lag bolts and metal shields
(ideal for temporary installation or if removal of car stops is necessary)

Step 1
Use 1/2" or 5/8 lag bolts (6" long).
http://www.gnrtech.com/img_gnr/speed_hump_b/EasyRiderSpeedBump_Installation2.gif

Step 2
Drill 1/2" diameter pilot holes (3 - 4" in depth) through the product's installation holes.
http://www.gnrtech.com/img_gnr/parking_curb/ParkIt_Installation2.gif

Step 3
Remove the product; re-drill the holes for the diameter and depth required by the metal shields.

Step 4
Install the metal shields, re-position the product and bolt with lag bolts and washers.

Maintenance

Parking curbs require minimal maintenance. Periodically inspect the bolts and tighten if necessary.
